

# Auto/Mate Dealership Systems

*Designed by Car People For Car People™*

Auto/Mate Dealership Systems was established over 25 years ago with a clear and simple goal: to provide automotive dealerships with a superior software solution and industry leading customer service at a reasonable price.

AMPS is a powerful yet easy-to-use Dealership Management System (DMS) suitable for any size dealership. Our core system includes solutions for all departments along with superior reporting tools, internal email, chat, and a real-time dashboard to monitor dealership metrics.

When compared to other systems, AMPS offers the most value per dollar, allowing dealerships to operate more efficiently and profitably. Our open-system allows your dealership to run AMPS on computer hardware you already have in place.

Auto/Mate's success has led to a continuous growth rate. We currently support thousands of satisfied users nationwide and look forward to adding you to our system.

## ▶ Best Customer Support

**Ranked "Highest Rated" DMS** in the 2012 & 2013 DrivingSales Dealer Satisfaction Awards

**Ranked #1** in 12 out of 16 categories\* including:

- Overall customer satisfaction

Choose from web-based (ASP) or in-house server

JITT®: Just-In-Time-Training and online

documentation

Integrated internal instant messages

Internal email

World-class data conversion

Data is stored forever

Trainers and support staff are "Car People"

## ▶ Why Auto/Mate?

Auto/Mate is a less expensive DMS alternative to ADP® and R&R®. We offer industry-leading features and functionality at a fraction of the price. Designed by former auto dealership executives, Auto/Mate provides fully-integrated modules to suit any size dealership.
